

## Back Check Valve-Data Sheet

**CV-TT**

Item Code: CV-TT01

Item Code: CV-TT02

The one way way/back check valve allow flow in only one direction.

When flow in the direction of the red arrow starts, the valve opens and allow fluid passing by.

When flow stops or reverses, the valve automatically closes.

This ensures uni-flow of needed saline and avoid any unnecessary back flow of drugs or blood due to mishandling of process, thus protects patient safety during intravenous administration.

- Aqueous IV solutions
- Optional lipid resistant

**Specifications:**

Ref No	Composition	Package	Opening Pressure	Back Pressure	Material
CV-TT01	Tube Ends Connection	Bulk	<2Kpa	300Kpa	ABS+Silicon
CV-TT02	Tube Ends	Bulk	<5Kpa	300Kpa	PC+Silicon
